
Geographic composition of impacts in 2050
Colour = magnitude; + burden; − credit
a
CL
b
OCE
acidification (AE)
climate change (GWP100)
ecotoxicity: freshwater (CTUe)
eutrophication: terrestrial (AE)
human toxicity: carcinogenic (CTUh)
material resources: metals/minerals - abiotic depletion potential (ADP): elements (ultimate reserves)
particulate matter formation - impact on human health
climate change: total (incl. biogenic CO2, incl. SLCFs) (GWP100)
